Dear Parent/Guardian,

It has been suggested that your child may benefit from Tier 2 services through KW Habilitation, Early Learning, Child Care & Family Resources. Tiered services promote inclusion and support for all children within licensed early learning programs. Universal Design for Learning is a framework that is the basis for this approach. Each Tier involves different levels of support/observation provided to the child, family and educators/caregivers involved.

Tier 2- Targeted Services “targeted to some”

Tier 2 may involve screening and/or short-term consultation. It happens in a group setting and may use specific resources and screens to determine whether a child requires further support. With short-term collaboration, the aim is **achievement of a goal within a specific timeframe, using general strategies that are targeted.**

Attached to this letter, the Resource Consultant who supports your child’s licensed child-care program has provided their contact information, along with a simple overview of services. Any documentation that outlines strategies or resources recommended for your child will be shared with you.

Please feel free to contact this Resource Consultant should you have any questions, concerns, or be seeking support for your child’s development.

I _____ acknowledge that my child _____

Will be seen by a KW Habilitation Resource Consultant for Tier 2 supports which may include virtual and/or in person consultation. I am aware I may revoke this consent at any time.

Parent/Guardian
